SESSION DESCRIPTIONS

MONDAY 1 / 3 1 SESSIONS

Harmonization: ADA Standards and the Building Code—Half Day AM

CEU: 0.4

Session 1

One of the most common and frustrating issues facing designers, code officials, and building owners is knowing exactly which accessibility requirements apply. Federal regulators and model code organizations have made groundbreaking progress in harmonizing their accessibility requirements. This program will discuss harmonization and some of the most common errors made in designing to accessibility requirements.

Book Fee: None

Experience Level: All

Instructors: Marsha Mazz, U.S. Access Board;
Suzanne Thomas, Pacific ADA Center (DBTAC)

2009 International Residential Code Update (Building)—Half Day PM

CEU: 0.4

Session 2

This half day class details the changes (building only) from the 2006 to the 2009 *International Residential Code*. Identifies changes in organization and code requirements and the applicability of these requirements to design, plan review and inspection.

Book Fee: \$10.00

Experience Level: Intermediate

Instructor: Steve Van Note, ICC

One and Two-Family Dwelling Electrical Systems

CEU: 0.8

Session 3

This comprehensive seminar explains installation, design, and inspection of electrical systems in new and existing one- and two-family dwellings in clear, concise language, with numerous pictures and graphics. This seminar is based on IAEI's book entitled *One- and Two-Family Dwelling Electrical Systems*, that includes the electrical requirements of both the *National Electrical Code (NEC)* and the *International Residential Code (IRC)*. This presentation is particularly helpful and valuable for inspectors, contractors, electricians, and students in making more accurate, thorough, and safer installations and inspections.

Book Fee: \$55.00

Experience Level: Intermediate

Instructor: Keith Lofland, IAEI

2010 NFPA 72 Fire Alarm Seminar; Day 1 of 2

CEU: 1.6

Session 4

This is the first day of a two day class. This Intermediate Fire Alarm seminar provides training on the requirements for proper design, installation, testing and maintenance of fire alarm systems. The seminar provides an in depth review of the requirements of NFPA 72-2010, *National Fire Alarm Code* and the permitted fire alarm wiring methods of NFPA 70-2008, *National Electrical Code*. The attendee should have a minimum of 2 years' field experience to receive maximum benefit from this course.

Book Fee: \$97.00

Experience Level: Intermediate

Instructor: Mike Baker, AFAA

Extreme Plan Review & Inspections

CEU: 0.8

Session 5

Addresses the very large and unusual building plan review and inspections. The class will focus on high-rise construction, atriums, very large buildings and unusual projects. The class will also discuss the special inspection process and how to monitor the program. The discussion will address the review and inspections of alternate designs and performance based design.

Book Fee: None

Experience Level: Intermediate

Instructor: Steve Thomas, CCC

IBC Existing Buildings

CEU: 0.8

Session 6

This seminar addresses the relationship of Chapter 34 of the 2009 *International Building Code* to existing buildings. The seminar focuses on the fundamental requirements on an existing structure that undergoes repair work, alteration, renovation activity or construction of an addition, and the effect of a change in the building's occupancy classification. Discussion will also include the "Performance Compliance Alternatives" method of evaluating a building.

Book Fee: None

Experience Level: All

Instructor: Tom Meyers, CCC

SESSION DESCRIPTIONS

MONDAY 1/31 SESSIONS

Introduction to the International Green Construction Code (IgCC)—Half Day AM			CEU: 0.4	Session 7
	This seminar will provide an overview of the critical concepts of the <i>International Green Construction Code</i> (IgCC), Public Version 1.0, as released March 15, 2010. Participants will gain an awareness of the code provisions and how to apply the code. This seminar will also describe the development of the IgCC and how it regulates new construction, existing construction, multiple occupancy classifications, and community development.			
Book Fee: None	Experience Level: All	Instructor: Robert D. Weber, RD Weber & Assoc.		
2010 Green Plumbing and Mechanical Code Supplement Essentials —Half Day PM			CEU: 0.4	Session 8
	This seminar provides participants with an overview of the 2010 <i>Uniform Green Plumbing and Mechanical Supplement</i> . Discussed in this seminar will be a brief history and goal of the document, how the supplement is organized, and how the document supplements other existing codes. Other specific topics and provisions will include, but are not limited to, water efficiency and conservation, alternate water sources, energy efficiency, environmental quality, and installation and maintenance requirements.			
Book Fee: None	Experience Levels: All	Instructor: Michael Mitchell, IAPMO		
2009 UMC Duct Systems and Installation Requirements			CEU: 0.8	Session 9
	This seminar provides a detailed review and discussion including: scope, materials, duct construction including bracing, installation and insulation of ducts, smoke and fire dampers, ventilating, use of under-floor space as supply plenums, automatic shutoffs and product-conveying ducts. Upon completion of this seminar, participants will be better able to locate and enforce the code provisions pertaining to duct systems as well as describe the basic concepts and code requirements for installations of duct systems. SMACNA Duct Inspection Guide will be provided.			
Book Fee: None	Experience Levels: Intermediate	Instructor: Tye Halverson, Southwest Air Conditioning		
Communicating and Connecting—Half Day AM			CEU: 0.4	Session 10
	This half day class provides the tools, skills and resources to insure messages are properly sent and received. This foundational skill set is extremely important as a success factor in leadership, customer service and team dynamics. All facets of the communication equation are reviewed and improved in this seminar.			
Book Fee: None	Experience Level: All	Instructor: Tim Schneider, SEE		
Understanding Yourself and Others-Leadership Style—Half Day PM			CEU: 0.4	Session 11
	This half day class is devoted to a single perspective: you. This program focuses on your personality and the impact your personality has on your environment and with others. This seminar will begin to unlock your behavioral traits and tendencies and develop the awareness of those in which you interact and work. The class will also focus on several key areas of how you communicate, solve problems, deal with conflict, make decisions, operate in a group or team dynamic and lead others.			
Book Fee: None	Experience Level: All	Instructor: Tim Schneider, SEE		
Masonry Quality and Field Practices			CEU: 0.8	Session 12
	This full day seminar addresses and provides the fundamentals of quality structural masonry construction and provides a working knowledge of the basics of masonry inspections. The session is tailored for individuals who are associated with structural masonry construction inspections. The subjects addressed in the session are found in the construction requirements of 2009 <i>International Building Code</i> and in the various reference standards that regulate masonry materials and construction.			
Book Fee: \$35.00	Experience Level: Intermediate	Instructor: John Chrysler, P.E., MIA		

SESSION DESCRIPTIONS

MONDAY 1 / 31 SESSIONS

Spanish In-A-Pinch for Code Enforcement Personnel

CEU: 0.8

Session 13

This class features a unique visualphonetic® approach to learning and retaining Spanish, complimented by profession-specific “Cheat Sheets.” Presents expressions and cultural insights. Upon completion, participants will be better able to share cultural insights, build language confidence, utilize an easy pronunciation key, speak four to five sentence patterns and expressions and speak a profession-specific vocabulary.

Book Fee: \$20.00

Experience Level: All

Instructor: Deby Jones, ICC

Crisis Communications, Media Relations and Using Social Media

CEU: 0.8

Session 14

This class will provide ideas, suggestions and how-to's for ensuring you can make the most of local media, including media-handling techniques, media release preparation and knowing what an editor or producer wants. Course work also includes an overview of changes in the mass communications industry, how different audiences are utilizing media and a close look at the pros and cons of social media and how to decide if it is right for you.

Book Fee: \$10.00

Experience Level: All

Instructor: Greg Sowell, AACE

TUESDAY 2 / 01 SESSIONS

2009 International Fire Code Update—Half Day AM

CEU: 0.4

Session 15

This half day class details the changes from the 2006 to the 2009 *International Fire Code*. Identifies changes in organization and code requirements and the applicability of these requirements to design, plan review and inspection.

Book Fee: \$10.00

Experience Level: Intermediate

Instructor: Kevin Scott, ICC

2009 International Building Code Update—Half Day PM

CEU: 0.4

Session 16

This half day class details the changes from the 2006 to the 2009 *International Building Code*. Identifies changes in organization and code requirements and the applicability of these requirements to design, plan review and inspection.

Book Fee: \$10.00

Experience Level: Intermediate

Instructor: Doug Thornburg, ICC

The 2011 IAEI NEC Analysis of Changes

CEU: 0.8

Session 17

This extensive and popular program analyzes the major changes to the 2011 *National Electrical Code (NEC)*. Members of the nineteen NEC Code-making panels contributed to the development of the authoritative text, which covers more than 400 of the most significant changes and includes interpretations by the group that enforces the NEC. The four-color book, which the seminar is based upon, is loaded with illustrations, photos, and text that clearly identify and explain the changes and their impact.

Book Fee: \$60.00

Experience Level: Intermediate

Instructor: Keith Lofland, IAEI

SESSION DESCRIPTIONS
TUESDAY 2/01 SESSIONS

2010 NFPA 72 Fire Alarm Seminar; Day 2 of 2

CEU: 0.8

Session 4

This is the second day of a two day class. This Intermediate Fire Alarm seminar provides training in the requirements for proper design, installation, testing and maintenance of fire alarm systems. The seminar provides an in depth review of the requirements of NFPA 72-2010, *National Fire Alarm Code* and the permitted fire alarm wiring methods of NFPA 70-2008, *National Electrical Code*. The attendee should have a minimum of 2 years' field experience to receive maximum benefit from this course.

Book Fee: N/A

Experience Level: Intermediate

Instructor: Mike Baker, AFAA

IBC Advanced Means of Egress

CEU: 0.8

Session 18

An advanced look at the means of egress requirements included in Chapter 10 of the 2009 *International Building Code*. The presentation will include detailed discussions on the design and review of the means of egress in unusual occupancies and conditions. Subjects included in the class are malls, assembly occupancies, special egress components, smoke proof enclosures, horizontal exits and exit passageways. Practical examples will be used to illustrate code requirements. This class is designed for those students that have a basic understanding of how the means of egress is designed and reviewed.

Book Fee: None

Experience Level: Intermediate

Instructor: Steve Thomas, CCC

IBC Fire Resistant Rated Construction

CEU: 0.8

Session 19

This seminar provides an in-depth discussion of the fire-resistant-rated construction, Chapter 7 provisions of the 2009 *International Building Code*. The class will include a discussion of available resources available to fire-resistance ratings. Subjects included in the seminar include fire wall, fire barriers, through penetrations and other fire-resistant rated assemblies. Students will be able to determine compliance with the code through plan review and inspections.

Book Fee: None

Experience Level: Intermediate

Instructor: Tom Meyers, CCC

Introduction to ICC 700-2008 National Green Building Standard

CEU: 0.8

Session 20

The ICC 700-2008 *National Green Building Standard* is a residential green building standard developed by ICC and the National Association of Home Builders. During this seminar participants will discuss the history, intent, and organization of the standard. They will also have the opportunity to apply portions of the standard to a realistic case study. Each student will receive the new ICC 700-2008 *National Green Building Standard* and the class workbook.

Book Fee: \$55.00

Experience Level: All

Instructor: Shirley Muns, ICC

2009 UMC and UPC Combustion Air and Venting

CEU: 0.8

Session 21

This seminar addresses the sizing of combustion air ducts for fuel gas burning appliances covered in Chapter 5 of the 2009 *Uniform Plumbing Code* and Chapter 7 of the 2009 *Uniform Mechanical Code*. It reviews the venting requirements in the UPC and the UMC. Specific topics discussed include, but are not limited to inside combustion air, the two duct systems, the single air duct system, combined inside and outside combustion air design. An exercise will cover sizing and calculations, short cuts for job site verification and sizing, vent sizing requirements, when GAMA tables must be used, and using the GAMA tables. Upon completion of this seminar, participants will be better able to locate and enforce the code provisions pertaining to combustion air and venting as well as describe the basic concepts and code requirements for installations of combustion air systems and venting.

Book Fee: None

Experience Level: Intermediate

Instructor: Roger Fuller, IAPMO

SESSION DESCRIPTIONS
TUESDAY 2/01 SESSIONS

Ethics and Integrity – Half Day AM

CEU: 0.4

Session 22

Ethics and Integrity is an important program that will assist participants in understanding the complex and often confusing nature of ethical behavior at work. The primary focus is to develop and use skills to identify ethical dilemmas, provide guidance to the correct and ethical course of action and to develop a heightened sense of ethical values. *This class satisfies the Quality Assurance Agency (QAA) education requirements for Clark County*

Development Services.

Book Fee: None

Experience Level: All

Instructor: Tim Schneider, SEE

Emotional Intelligence-Self and External Management–Half Day PM

CEU: 0.4

Session 23

No one is really able to manage and lead others unless they are able to manage themselves. This half-day class utilizes the personal half of emotional intelligence to build the skills needed to correctly manage actions, words, demeanor, attitude and image. The importance of a person's example and that impact on others is the primary focus and the class also reviews how to obtain meaningful feedback about personal behavior and attitudes. Often people do not see some of the very behavior that is most destructive to the working environment.

Book Fee: None

Experience Level: All

Instructor: Linda Florence, SEE

Frequently Misunderstood IBC and ASCE 7-05 Structural Provisions

CEU: 0.8

Session 24

This seminar will address the top 10 misunderstood structural provisions in the 2009 *International Building Code* and ASCE 7-05 including: 1) Redundancy Factor, 2) Drift Determination and Building Separation, 3) Minimum Seismic Design Base Shear, 4) Live Load Reduction, 5) Seismic Analysis Procedure Selection, 6) Enclosure Classification for Wind Design, 7) Special Seismic Load Combinations, 8) R, Cd and Overstrength Factor Values for Horizontal and Vertical Combinations, 9) Seismic and Wind Design of Parapets and 10) Torsion, Torsional Irregularity and Direction of Seismic Loading.

Book Fee: None

Experience Level: Intermediate–Advanced

**Instructors: S.K. Ghosh, Ph.D., SKGA
Susan Dowty, S.E., SKGA**

2009 IFC and IBC Hazardous Materials Provisions

CEU: 0.8

Session 25

The Hazardous Materials Provisions seminar addresses requirements for buildings utilizing hazardous materials and requiring coordination between the fire and building codes. It reviews the requirements found in Chapters 27 through 44 of the 2009 *International Fire Code*, as well as Chapter 3, and Sections 414 and 415 of the 2009 *International Building Code*.

Book Fee: \$20.00

Experience Level: Intermediate

Instructor: Scott Stookey, ICC

Social & Economic Responsibility of Code Enforcement–Half Day AM

CEU: 0.4

Session 26

This class will describe the responsibilities and the effects that code officers have regarding the safety and welfare of neighborhoods, the citizens, as well as the economic impact that officers yield to their communities. The Code Leadership Advancement portion of this class is designed to inform the participant of how to become more promotable and marketable through various stages of strategic planning, training and interaction with internal and external customers.

Book Fee: \$10.00

Experience Levels: All

Instructor: Kelvin Beene, AACE

SESSION DESCRIPTIONS

Enhancing Your Communications in Code—Half Day PM

CEU: 0.4

Session 27

This class will display various techniques that will help enhance the code enforcement officer's communication skills. It will assist in dealing with difficult people and situations as well as halt verbal attacks and set guidelines for verbal interactions between citizens and officers.

Book Fee: \$10.00

Experience Level: All

Instructor: Kelvin Beene, AACE

WEDNESDAY 2/02 SESSIONS

2009 IRC Significant Changes

CEU: 0.8

Session 28

Familiarizes building officials, fire officials, plans examiners, inspectors and design professionals with many of the important changes in the 2009 *International Residential Code*. Assists code users in identifying the specific code changes that have occurred, and more importantly, understanding the reason behind the change. Focuses on those code changes selected due to their frequency of application, special significance or change in application.

Book Fee: \$40.00

Experience Level: Intermediate

Instructor: Steve Van Note, ICC

Commercial Electrical Inspections

CEU: 0.8

Session 29

This workshop is a must for installers and inspectors alike or for anyone who needs to enhance his or her general understanding of *Code* rules and how to apply these rules in everyday situations. Based on the current *NEC*, this seminar will explain, in clear, concise language, code structure involving installation, design and inspections of commercial electrical systems. This seminar goes through a checklist style format for such things as underground rough-in, wall rough-in, ceiling rough-in, services, and grounding and bonding requirements one would encounter in the commercial environment of the electrical installation.

Book Fee: None

Experience Level: Intermediate

Instructor: Mark Hilbert, IAEI

2009 IFC Significant Changes

CEU: 0.8

Session 30

Familiarizes fire officials, fire plans examiners, inspectors and design professionals with many of the important changes in the 2009 *International Fire Code*. Assists code users in identifying the specific code changes that have occurred, and more importantly, understanding the reason behind the change. Focuses on those code changes selected due to their frequency of application, special significance or change in application.

Book Fee: \$40.00

Experience Level: Intermediate

Instructor: Scott Stookey, ICC

IBC Building Areas, Fire Areas, Mixed Occupancies

CEU: 0.8

Session 31

This seminar provides a comprehensive discussion of the major compartmentalization concepts of the 2009 *International Building Code*, focusing on those requirements that deal with building size, sprinkler options and mixed-use buildings. Fire-resistance-rated construction is also addressed. This class will include topics on allowable areas, area increases, unlimited area buildings, fire area concept and construction, incidental/accessory use areas and separated/non-separated uses.

Book Fee: None

Experience Level: Intermediate

Instructor: Tom Meyers, CCC

Commercial Building Inspections

CEU: 0.8

Session 32

This class provides commercial inspectors with improved techniques and an understanding of conducting building inspections of moderate to large size commercial buildings. The seminar will focus on the required and special inspections required by the 2009 *International Building Code*. The discussion will include inspections of concrete, masonry and steel construction. It will also include inspections of fire-resistance construction, means of egress and accessibility portions of the building.

Book Fee: None

Experience Level: Intermediate

Instructor: Steve Thomas, CCC

SESSION DESCRIPTIONS

WEDNESDAY 2/02 SESSIONS

Introduction to Green Plumbing and Mechanical Concepts

CEU: 0.8

Session 33

This seminar is designed to introduce participants to green plumbing and mechanical concepts, products, and installations. The discussion of green plumbing will focus on the need for green applications and water conservation. Some of the green plumbing concepts covered in this discussion include, but are not limited to reduced volume fixtures, low-flow flush toilets, low-flow and waterless urinals, gray water systems, reclaimed water, and water heating. The green mechanical portion of the program will focus on energy conservation and indoor air quality. Some of the green mechanical concepts covered in this discussion include, but are not limited to high efficiency boiler systems, high efficiency forced air systems, thermal mass and storage, geothermal applications, and solar heating.

Book Fee: None

Experience Level: All

Instructor: Michael Mitchell, IAPMO

2009 UPC Drainage, Waste and Venting Provisions

CEU: 0.8

Session 34

This seminar provides a detailed review and discussion of the various drain, waste, and vent requirements in the 2009 *Uniform Plumbing Code*. Topics covered in this seminar include, but are not limited to: Use of joints, drainage fixture units, installation and sizing of building sewers, sumps & sewage ejectors, indirect waste piping, chemical waste, steam and hot water drainage, condensers and sumps, vent sizing and termination, island venting, combination waste and vent and wet vents. Upon completion of this seminar, participants will be better able to locate and enforce the code provisions pertaining to drains, waste, and vents as well as describe the basic concepts and code requirements for DWV installations.

Book Fee: None

Experience Level: Intermediate

Instructor: Roger Fuller, IAPMO

Empowerment, Delegation and Development—Half Day AM

CEU: 0.4

Session 35

The initial focus of this program is to overcome the common obstacles associated with delegation and transform simple task delegation into an empowerment process. The transition to empowerment is important in succession planning, developing team members and creating a truly high performance environment. The second foundation of this program is the developmental side of coaching. This includes mentoring potential growth and replacement candidates, providing opportunities for leadership development and creating opportunities for learning and advancement.

Book Fee: None

Experience Level: All

Instructor: Tim Schneider, SEE

Innovation and Creativity—Half Day PM

CEU: 0.4

Session 36

This class provides an important set of competencies and skills needed to insure you and your organization remain on the cutting edge and not just replicating history. This program is designed to transform you and your company into change agents. Not for the sake of change but for real improvement and innovation. This program will introduce two critical learning areas. **Object Oriented Innovation™** is an approach to innovation that is focused on the end result or project goal. The other critical area is about using **Champion and Challenger Methodology™** to achieve constant improvement in processes and testing of existing methods with minimum risks.

Book Fee: None

Experience Level: All

Instructor: Tim Schneider, SEE

2009 IBC Significant Structural Changes

CEU: 0.8

Session 37

This course is a structural overview of the significant changes to the 2009 *International Building Code* (IBC) and referenced standards, including ASCE/SEI 7-05 + Supplement No. 2, ACI 318-08, ACI 530-08/ASCE 5-08/TMS 402-08, AISC 360-05 (combines ASD & LRFD into single unified steel design specification) and AF&PA NDS-2005 (now combines ASD & LRFD into single unified wood design specification). The course will also include the design requirements for determining snow, wind, and seismic loads which the 2009 IBC code refers to the load provisions in ASCE 7-05 exclusively.

Book Fee: \$30.00

Experience Level: Intermediate

Instructor: Jerry B. Neville, ICC

SESSION DESCRIPTIONS

WEDNESDAY 2/02 SESSIONS

IBC Accessibility—Advanced

CEU: 0.8

Session 38

Devoted to advanced accessibility requirements using the 2009 *International Building Code (IBC)* and ICC/ANSI A117.1-2003, *Accessible and Usable Buildings and Facilities*. Topics will include scoping for accessible design, compliance paths for existing buildings, and Accessible, Type A and Type B residential requirements. The class will provide federal accessibility background to help the student negotiate the maze of regulations and their base intent in the IBC.

Book Fee: \$20.00

Experience Level: Intermediate

Instructor: Jay Woodward, ICC

Stop in the Name of the Law—Half Day AM

CEU: 0.4

Session 39

This half day course is designed to assist the code enforcement officers in their daily inspections as it relates to constitutional laws. Code enforcement officers are spending more time in courts being sued not only by the customers that they serve but also civil suits being pursued by national and local organizations, leaving code officers wondering if they have absolute immunity by simply following the ordinances adopted by the county and municipality. The course will touch on the aspects of the law and why code officers continue to violate the law and additionally describe penalties and costs associated with breaking the law.

Book Fee: \$10.00

Experience Levels: All

Instructor: Reggie Jackson, AACE

"Zoning"- the Achilles' Heel of Code Enforcement —Half Day PM

CEU: 0.4

Session 40

This half day course is designed to identify and provide knowledge to code enforcement officers of their authority of policing powers throughout municipalities in relation to the comprehensive plan. The course will also place its emphasis on the code department/divisions acceptance in embracing and acknowledging zoning and its affect that it has on not only the growth of department or division, but also on the impact that zoning has on a municipality's economic development which ultimately leads to the aspects of the "Quality of Life" standards.

Book Fee: \$10.00

Experience Levels: All

Instructor: Reggie Jackson, AACE

THURSDAY 2/03 SESSIONS

2009 IBC Significant Changes

CEU: 0.8

Session 41

Familiarizes building officials, fire officials, plans examiners, inspectors and design professionals with many of the important changes in the 2009 *International Building Code*. Assists code users in identifying the specific code changes that have occurred, and more importantly, understanding the reason behind the change. Focuses on those code changes selected due to their frequency of application, special significance or change in application. Discusses over 120 changes, with a major emphasis on those provisions addressing fire and life safety.

Book Fee: \$40.00

Experience Level: Intermediate

Instructor: Doug Thornburg, ICC

NEC Fundamentals - Application and Use of the NEC

CEU: 0.8

Session 42

Through this seminar, attendees will have a better understanding of the structure and organization of the *National Electrical Code* and how to properly apply it in real world settings. The course uses examples and student participation. Each session will increase the student's ability to establish a fix on the information contained in the *NEC*, to ease anxiety levels in the testing environment and to apply the *NEC* to actual field installations.

Book Fee: None

Experience Level: All

Instructor: Mark Hilbert, IAEI

SESSION DESCRIPTIONS

THURSDAY 2/03 SESSIONS

NFPA 13, 13R & 13D—2010 Sprinkler Systems

CEU: 0.8

Session 43

This full day seminar leads the attendees through a review of the most substantial changes from the 2007 edition and the impact upon the industry. Some of the more compelling revisions involve storage including the introduction of the CMSA (Control Mode Specific Application) classification for sprinklers and changes to the area/design curves, along with numerous general installation and design issues. The 2010 edition of the standard contains information regarding the latest in technology and design concepts. This seminar will benefit contractors, designers, Authorities Having Jurisdiction, or anyone who deals with the design and installation of fire sprinkler systems. Changes to the 13D & 13R Standards will also be covered in this session. Participants should bring a copy of NFPA 13, 2010 Edition.

Book Fee: None

Experience Level: Intermediate

Instructor: Russ Leavitt, CLSE

IBC Multi-Family Construction

CEU: 0.8

Session 44

Overview of the requirements for multi-family dwellings in the 2009 *International Building Code*. Type V-A construction may be the most difficult type of construction to build a structure. This seminar discusses the design, construction and inspection of Group R-2 occupancies including, building planning, fire-resistance-rated construction, fire protection requirements and means of egress requirements.

Book Fee: None

Experience Level: Intermediate

Instructor: Tom Meyers, CCC

Exterior Wall Systems

CEU: 0.8

Session 45

This class discusses both the 2009 *International Residential Code* and *International Building Code* requirements for exterior wall cladding systems. General installation requirements of products will be discussed, including weather barriers, flashing, wood/hardboard siding, masonry veneer, stucco and exterior insulated finish systems.

Book Fee: None

Experience Level: Intermediate

Instructor: Steve Thomas, CCC

Inspection Requirements of the 2009 IECC—Half Day AM

CEU: 0.4

Session 46

Review of the significant changes and inspection requirements for compliance with the 2009 *International Energy Conservation Code* (IECC). Session will cover the DOE mandates, and what is being required for proper inspections (including explanation of 3rd party inspections) to verify compliance with both the residential and commercial aspects of the IECC.

Book Fee: None

Experience Level: Intermediate

Instructor: Don White, City of Las Vegas

Plan Review Requirements of the 2009 IECC—Half Day PM

CEU: 0.4

Session 47

Review of the significant changes and plan review techniques for verifying plan compliance with the 2009 *International Energy Conservation Code* (IECC). Session will cover the DOE mandates, and what is being required for proper residential and commercial energy code plan submittals, including calculations, to verify compliance with both the residential and commercial aspects of the IECC.

Book Fee: None

Experience Level: Intermediate

Instructor: Don White, City of Las Vegas

2009 UPC Water and Gas Pipe Sizing—Half Day AM

CEU: 0.4

Session 48

This seminar provides participants with how-to instruction on properly sizing water and gas piping systems and their components in accordance with the 2009 *Uniform Plumbing Code*. Participants will have the opportunity to practice what they learn in this hands-on learning experience. Participants will be better able to identify the appropriate sizing requirements in the code as well as properly determine the correct pipe sizing for the systems they encounter in the field.

Book Fee: None

Experience Level: Intermediate

Instructor: Tim Collings, IAPMO

SESSION DESCRIPTIONS

THURSDAY 2/03 SESSIONS

Listing and Testing Requirements Under the 2009 UMC & UPC-Half Day PM CEU: 0.4 Session 49

This session discusses the approval process for plumbing and mechanical products in the United States and its interrelationship to the codes and product standards. The program will cover the key aspects and importance of 3rd party certification for plumbing and mechanical products, and mechanisms for determining code compliance in the field.

Book Fee: None

Experience Level: Intermediate

Instructor: Tim Collings, IAPMO

Critical and Systems Thinking—Half Day AM CEU: 0.4 Session 50

This class examines several key elements in leadership development related to how leaders view their world and ultimately, how successful they are at seeing the big picture. The class provides the skills needed to critically examine any project, proposal or operational function by asking probing questions, inquiring about the "why" and connecting activities back to the core mission of a business. This program continues with expanding thinking and analysis into a more global and systems approach that is focused on finding unintended consequences of decisions and actions.

Book Fee: None

Experience Level: All

Instructor: Tim Schneider, SEE

Career Management and Decision Making—Half Day PM CEU: 0.4 Session 51

For generations, people worked at the same company in the same career field. They started in their twenties, retired in their sixties and received the company pension. One job. One career path. Mutual loyalty between employee and company. Fast forward to the 21st century and **Career Management and Decision Making** is more needed now than ever before. With a focus on both internal and external career decisions, this program will take participants through hidden job markets, self marketing techniques and interviewing tips.

Book Fee: None

Experience Level: All

Instructor: Linda Florence, SEE

Fundamentals of Post-Tensioning Design, Analysis and Construction-Half Day AM CEU: 0.4 Session 52

Analysis, design, and construction fundamentals with an emphasis on post-tensioned buildings. This course will present post-tensioning technology (materials, fabrication and installation procedures), analysis and design (load balancing, secondary moments, pre-stress losses, example problems, code requirements), applications (tendon layout and retrofit), construction and installation procedures.

Book Fee: None

Experience Level: Intermediate

Instructor: Miroslav F. Vejvoda, P.E., PTI

Inspection of Post-Tensioning Installations and Finishing-Half Day PM CEU: 0.4 Session 53

This class will focus on the installation of the post-tensioning systems. All parts of the field process will be addressed (material deliveries and storage, material handling, layout of post-tensioning tendons, supports, stressing, and finishing of the stressing pockets). The equipment and its maintenance will be mentioned. All aspects of inspecting the installation process will be discussed, with explanations of code and specification requirements.

Book Fee: None

Experience Level: Intermediate

Instructor: Miroslav F. Vejvoda, P.E., PTI

2009 IFC Flammable and Combustible Liquids CEU: 0.8 Session 54

This course provides a basic understanding of the flammable and combustible liquids storage, use, dispensing, handling and mixing requirements in Chapter 34 of the *International Fire Code (IFC)* and NFPA 30, *Flammable and Combustible Liquids*. General fire code requirements for hazardous materials and specialized requirements for motor vehicle fuel-dispensing activities (IFC Chapter 22), dry cleaning (IFC Chapter 12) and other specialized uses of flammable and combustible liquids are not covered in detail due to the time limitations of a single-day course.

Book Fee: \$20.00

Experience Level: Intermediate

Instructor: Kevin Scott, ICC

SESSION DESCRIPTIONS

THURSDAY 2/03 SESSIONS

Criminal Law Prosecution, Administrative Search Warrants—Half Day AM

CEU: 0.4

Session 55

This class will cover all aspects of effectively preparing the best case possible for success in the courtroom - criminal, civil, or administrative. The class will begin with an interactive discussion on the law of administrative search warrants, the process of obtaining one, and examples of when warrants are or are not required. The class will then move onto criminal law prosecution and discuss courtroom procedures, “do’s and don’ts” of testifying, and end with a mock trial to provide everyone with a real-life look into the “life” of a trial.

Book Fee: \$10.00

Experience Levels: All

Instructors: Joe Nino & Savita Rai, AACE

Civil Litigation, Administrative Law, Legal Updates— Half Day PM

CEU: 0.4

Session 56

This class will cover the civil and administrative side of code prosecution when repeat violators just “don’t get it” after being found guilty time after time in municipal court. The civil side of prosecuting cases will be discussed and how the rules of engagement differ in civil district courts. We will review the law of public and common nuisance abatement. Finally, we will discuss recent decisions issued by courts across the country related to code enforcement and emerging trends in the field.

Book Fee: \$10.00

Experience Level: All

Instructors: Joe Nino & Savita Rai, AACE

FRIDAY 2/04 SESSIONS

2009 International Residential Code Update (Building) —Half Day AM

CEU: 0.4

Session 57

This half day class details the changes (building only) from the 2006 to the 2009 *International Residential Code*. Identifies changes in organization and code requirements and the applicability of these requirements to design, plan review and inspection.

Book Fee: \$10.00

Experience Level: Intermediate

Instructor: Steve Van Note, ICC

2009 International Building Code Update—Half Day PM

CEU: 0.4

Session 58

This half day class details the changes from the 2006 to the 2009 *International Building Code*. Identifies changes in organization and code requirements and the applicability of these requirements to design, plan review and inspection.

Book Fee: \$10.00

Experience Level: Intermediate

Instructor: Doug Thornburg, ICC

Low Voltage and Limited Energy Wiring Systems

CEU: 0.8

Session 59

This seminar is a must for those who wish to keep informed and increase their expertise with low voltage electrical systems. Instruction covers general *NEC* requirements for low voltage wiring and low voltage systems. Also covered in this seminar are the general requirements for limited energy circuits and systems and grounding and bonding requirements for limited energy systems. In clear, easily understood language, the instructor reviews the characteristics of Class 1, Class 2, and Class 3 circuits.

Book Fee: None

Experience Level: Intermediate

Instructor: Mark Hilbert, IAEI

SESSION DESCRIPTIONS

FRIDAY 2/04 SESSIONS

NFPA 14—2010 Standpipes & Hose Streams—Half Day AM

CEU: 0.4

Session 60

This seminar is designed to provide an overview of the 2010 standard as well as specific chapter-by-chapter discussion highlighting the specific requirements for the design and installation of standpipe systems and related components. Participants will gain a greater understanding of the organization and layout of NFPA 14 and how standpipes are utilized in fire fighting techniques. Estimators, engineers, designers, field personnel, inspectors, and plan reviewers will all benefit from this information packed seminar. Participants should bring copies of NFPA 13 and 14 along with a scientific calculator.

Book Fee: None

Experience Level: Intermediate

Instructor: Russ Leavitt, CLSE

NFPA 25—2010 Testing/Maintenance of Fire Protection Systems—Half Day PM

CEU: 0.4

Session 61

This seminar provides a comprehensive review of the 2010 edition of NFPA 25. This latest edition contains a number of significant changes regarding the scope of the standard, owner's responsibilities, and frequency changes for some of the more significant inspections and tests. In addition, the standard contains direction regarding various levels of deficiencies and clarification regarding the requirements for dealing with internal obstructions. Attendees will learn the scope of the standard, the owner's responsibilities, requirements for record keeping, as well as the liabilities associated with performing this work on a contracted basis.

Book Fee: None

Experience Level: Intermediate

Instructor: Russ Leavitt, CLSE

IRC Plan Review

CEU: 0.8

Session 62

Designed to provide a broad overview of the process for residential plan review, this one day course will provide the basic steps involved to complete a comprehensive review of a residence. The class will discuss the tools and process for conducting a residential plan review. It will also increase your awareness of the necessary items required to insure code compliance of the homes built in your jurisdiction.

Book Fee: None

Experience Level: Intermediate

Instructor: Tom Meyers, CCC

Glass and Glazing Requirements of the IBC —Half Day AM

CEU: 0.4

Session 63

This half-day comprehensive review of Chapter 24 of the 2009 *International Building Code* will describe the different requirements for glass and glazing. The primary focus will be on the safety glazing requirements and how to identify the different types of glass; the different applicable standards and multiple exceptions to the code requirements. The class will also discuss the federal preemption of safety glazing and how the federal standard relates to the application of the building code.

Book Fee: None

Experience Level: Intermediate

Instructor: Steve Thomas, CCC

Plastics in the IBC —Half Day PM

CEU: 0.4

Session 64

This half-day comprehensive review of Chapter 26 of the 2009 *International Building Code* will cover the requirements for plastic materials included in the building. Discussion will include foam plastic requirements, light-transmitting plastics and new material on the market. The class will also discuss the thermal barrier requirements for foam plastic installations. ICC Evaluation Reports for plastic materials will be used and discussed in the class.

Book Fee: None

Experience Level: Intermediate

Instructor: Steve Thomas, CCC

Door and Window (Fenestration) Requirements of the 2009 IECC—Half Day AM

CEU: 0.4

Session 65

This session will cover the 2009 IECC requirements for doors and windows, the basics of how windows and doors should be used in the energy envelope, the various characteristics and performance capabilities of commonly used windows and doors and the manufacturers NFRC labeling requirements. The course will also provide an in-depth discussion of the methods for meeting certification and labeling requirements for site built windows, including third party performance simulation information, plan submittal requirements, site certifications by a NFRC accredited inspection agency and the use of NFRC's new CMAT simulation software as an alternative for certification.

Book Fee: None

Experience Level: Intermediate

Instructor: John Lewis, NFRC

SESSION DESCRIPTIONS

FRIDAY 2/04 SESSIONS

Third Party Testing Agencies and Their Role in Energy Efficient Homes -Half Day PM CEU: 0.4

Session 66

This class provides an overview of HERS raters and BPI certified testing agencies, including an in-depth discussion as to their purpose and how rater certification is achieved. Review of 2009 IECC requirements for building envelope and duct sealing, how verification tests are performed and the 3rd party agency's role in testing and verification. Also discusses the role HERS raters play in residential above-code energy home certification programs, with description of Energy Star Certification and other commonly used residential

above code programs, how they work, their differences, the methods of compliance, current utility and tax incentive and other factual benefits to the builder and home buyer.

Book Fee: None

Experience Level: All

Instructor: Mark Kindelberger, ConSol

2009 UPC Update—Half Day AM

CEU: 0.4

Session 67

In this seminar, participants will learn about the notable changes between the 2009 *Uniform Plumbing Code* and the 2006 edition. The changes are noted during the seminar and supporting information about the changes is provided. General topics such as administration, definitions and general requirements are covered as well as specific topics that include water heaters, water supply and distribution, traps and interceptors, and

health care facilities and medical gas and vacuum systems.

Book Fee: None

Experience Level: Intermediate

Instructor: Tim Collings, IAPMO

2009 UMC Update—Half Day PM

CEU: 0.4

Session 68

In this seminar, participants will learn about the notable changes between the 2009 *Uniform Mechanical Code* and the 2006 edition. The changes are noted during the seminar and supporting information about the changes is provided. General topics such as administration, definitions and general requirements are covered as well as specific topics that include exhaust systems, duct systems, chimneys and vents, hydronics, steam and hot water

boilers, and fuel gas piping.

Book Fee: None

Experience Level: Intermediate

Instructor: Tim Collings, IAPMO

Dealing with Difficult People-Customers and Team Members—Half Day AM

CEU: 0.4

Session 69

In this class students will learn how to deal with the caustic, unmotivated, disengaged, arrogant, mean and just plain difficult humans. Difficult people come in all aspects of professional life. They can be customers, co-workers or team members. The class will identify the common types and hybrids of difficult people, understanding the motivations and reasons that people become difficult, and will provide students the skills, tactics and approaches in dealing with difficult people.

Book Fee: None

Experience Level: All

Instructor: Linda Florence, SEE

12 Characteristics of Great Leadership—Half Day PM

CEU: 0.4

Session 70

Through 20 years of active research, we have identified twelve highly predictive characteristics of a great leader. The Twelve Characteristics of Great Leadership is much more than a seminar or training program. It is a core architecture of successful leadership and the title of a soon-to-be published book. In this program, participants are guided through the unwavering characteristics, skills and traits of great leadership and the skills and competencies associated with each commandment.

Book Fee: None

Experience Level: All

Instructor: Tim Schneider SEE

SESSION DESCRIPTIONS

FRIDAY 2/04 SESSIONS

Lateral Force Resisting Systems for Wood Construction—Half Day AM

CEU: 0.4

Session 71

This half-day seminar is intended to provide participants with an overview of the design and construction of lateral load resisting systems for light framed wood buildings. Topics to be covered include application of lateral loads to light wood framed buildings, behavior of structures subjected to lateral loads, common types of horizontal and vertical lateral force resisting systems for wood frame construction, 2009 IBC criteria for conventional braced wall systems, critical elements of wood framed shear-wall design, shear transfer and shear transfer detailing, and critical elements of shear wall hold-down anchorage.

Book Fee: None

Experience Level: Intermediate

Instructor: Ron Beehler, S.E., Interwest

Structural Welding and High-Strength Bolting—Half Day PM

CEU: 0.4

Session 72

This half-day seminar will provide participants with general information on structural welding and structural bolting based on the provisions of AISC 360-05, AWS D1.1-04 and AISC-RCSC “*Specification for Structural Joints using ASTM A325 or A490 Bolts*”. Topics discussed for bolted connections will include design methodology, types of bolts, allowable tension and shear design values for threaded fasteners, spacing and edge distance requirements. Welding topics will include design methodology, weld types, welding methods, weld symbols and procedures. Special inspection requirements related to bolted and welded connections will also be discussed.

Book Fee: None

Experience Level: Intermediate

Instructor: Bill Rodgers, S.E., Interwest

Special Inspector Certification Renewal

CEU: 0.8

Session 73

Designed as a certification renewal update seminar for special inspectors, this seminar is tailored to the needs and interests of ICC’s six special inspector certification categories: Reinforced Concrete, Prestressed Concrete, Structural Masonry, Structural Steel and Bolting, Structural Welding, and Spray-Applied Fireproofing. This seminar will satisfy 0.8 Continuing Education Units (CEUs) of the total required 2.5 CEUs for special inspector certification renewal.

Book Fee: \$20.00

Experience Level: Intermediate

Instructor: Jerry B. Neville, ICC

Code Officers & Landlord/Tenant Relations & Responsibilities—Half Day AM

CEU: 0.4

Session 74

In dealing with rental properties, local code officers may encounter property owners who shift compliance responsibilities to their tenants, and tenants who shift compliance responsibilities to their landlords. Although the Georgia Landlord-Tenant Act governs some of these interactions, cities and counties can adopt additional restrictions and regulations to clarify the responsibilities of both landlords and tenants. The better local code officers understand the respective responsibilities of landlords and tenants and local government’s regulation of this relationship, the easier it will be for them to perform their jobs effectively.

Book Fee: \$10.00

Experience Level: All

Instructor: Marcus Kellum, AACE

Signage and Right-of-Way Encroachments—Half Day PM

CEU: 0.4

Session 75

Right-of-way encroachments come in many forms including signs, trailers, landscaping, vehicles, drainage structures, and more. In addition, adjoining property owners often do not realize where their property ends and where public property begins. They consider the public right-of-way to be theirs to use as they please. Regardless of the types of ordinances, cities and counties may adopt to regulate public rights-of-way; local governments have liability for what goes on in these areas. Consequently, local code officials must deal with encroachments uniformly and fairly, but do so in a manner that complies with current statutes and case law, as well as what makes the most political sense. The course will focus on how to treat these issues fairly, uniformly, and in a manner that complies with current statutes and case law.

Book Fee: \$10.00

Experience Level: All

Instructor: Marcus Kellum, AACE

REGISTRATION INFORMATION

Registration includes: Instruction, reference materials or books (when applicable), lunch and break refreshments. Codes and other reference books are NOT provided and are the responsibility of the student. For your convenience, code books and other reference materials may be purchased from the International Code Council (ICC) on-site bookstore during the conference. Please review the session descriptions for required reference materials.

REGISTRATION COSTS

SAVE MONEY—REGISTER EARLY

Early Registration

\$600—Full Five Day Week per Registrant

\$150—Per Day or Session

Early Registration ends on **January 14, 2011**

Late or On-site Registration

\$800—Full Five Day Week per Registrant

\$200—Per Day or Session

REGISTRATION METHODS

1. REGISTER ONLINE

The Code Council's secure website: www.iccsafe.org/training.

Follow the easy online directions.

2. REGISTER BY MAIL

Complete the registration form on the next page and mail to:

EduCODE Registrar

International Code Council

Chicago District Office

4051 West Flossmoor Road

Country Club Hills, Illinois 60478

3. EDUCODE HELP LINE

Contact the International Code Council at 1-888-422-7233 extension 33817 or jfranklin@iccsafe.org

CONFIRMATION

Registration confirmation will be sent by EduCODE within two days of receipt of registration.

CANCELLATION POLICY

If you need to cancel, EduCODE must receive notification in writing by January 14, 2011 for you to receive a full refund. All refund requests after this date may receive credit towards future EduCODE conference attendance.

CONFERENCE LOCATION

The Orleans Hotel & Casino

Mezzanine Level

4500 W. Tropicana Avenue

Las Vegas, NV

1-800-675-3267

ROOM RESERVATIONS

Room reservations must be made by December 30, 2010. Please call 1-800-675-3267 and identify yourself as an attendee of the **EduCODE Conference 2011** to obtain the discounted room rates, as follows:

\$76 Saturday night, 1/29/2011

\$32 Sunday—Thursday night, 1/30/2011—2/03/2011

\$76 Friday & Saturday night, 2/04/2011 & 2/05/2011

You may also contact The Orleans on line at:

www.orleanscasino.com/groups.

Please be sure to provide the **EduCode Group Code 1EDUC01**.

DON'T FORGET BOOK YOUR ROOM BY December 30, 2010

SUBSTITUTIONS

Whenever a registrant is unable to attend a paid class session, a request for substitution may be made by contacting ICC at 1-888-422-7233, ext. 33817. Requests after January 14, 2011, must be made in person at the EduCODE Conference Registration Booth.

CONTINUING EDUCATION INFORMATION

All EduCODE sessions are recognized by ICC for CEU's towards maintenance of your ICC certifications. Check with your local licensing board for additional CEU requirements.

EDUCODE EXPO - EVENTS - BOOK

DON'T FORGET TO ATTEND OUR SPECIAL EVENTS!!

Monday Night : Welcoming Event, sponsored by NFRC

5:00 PM to 7:00 PM (Expo Hall)
